

Southern West Virginia Community and Technical College is accepting bids for an assessment management solution. The solution needs to track outcomes assessment, evaluate program quality, and document institutional effectiveness for accreditation including but not limited to the following: comprehensive longitudinal documentation and reporting on goals, measures, findings, and actions; assess academic and non-academic program quality; link assessment efforts with related plans, budgets, and resources; customize workspaces to develop strategic plans and program review processes, and; track outcomes alignment at the course, program, and institutional level.

The solution must also include an ePortfolio system to support experiential learning and a holistic student and faculty experience; document and assess learning milestones; collect and share a picture of achievements over time; foster deeper reflection on student learning experiences; aggregate reporting data from rubrics, tests, and quizzes all aligned with institutional and specialized industry standards and; measure progress on learning outcomes in courses, programs, and college-wide initiatives.

The solution must integrate with our SIS-Banner and our LMS-Blackboard Learn 9.1 and allow seamless integration between products.

Southern expects a wide range of training and ongoing support materials, including quick guides, video tutorials, and online training sessions. A train-the-trainer method of implementation is desired.
