Health Care Technology

Certificate
30 Credit Hours

Purpose

The Health Care Technology Certificate Program prepares graduates as multi-skilled flexible health care workers, who work under the direction of licensed professionals such as, medical laboratory technologists and physicians. Students may work in a variety of health care settings.

Certification exams may be available and students are expected to take appropriate national certification exams. The Health Care Technology Program graduate is not intended to be a medical laboratory technician.

The full Health Care Technology Program is available on the Logan Campus. The Boone/Lincoln, Williamson, and Wyoming/McDowell campuses offer the program support courses only.

Medical Laboratory Assistant
