

Electrical Engineering Technology Program Mission Statement

The Electrical Engineering Technology Program has the mission to provide an academic and technical education with sequential/practical instruction for the development of the student as a mature, responsible electrical technician. The EET program equips its students with the skills and knowledge to enter the electrical engineering field prepared and ready to assume industry-related responsibilities

Electrical Engineering Technology Program Outcomes

Students will:

1. Communicate effectively, verbally or written, to others during presentations and report writing.
2. Apply critical thinking and math skills during electrical engineering simulations and apply various scientific laws.
3. Demonstrate consistently the concepts of safety.
4. Display professionalism when working in a culturally diverse environment.
