

Information Technology Mission Statement

The mission of the Associate of Applied Science in Information Technology (A.A.S. Information Technology) program is to prepare students for successful careers as IT professionals and to make a positive contribution to society. This will enhance the lives of our graduates and will also serve the needs of our community and constituents who employ them. Our goal is to give the students an enjoyable learning experience, enhanced by innovative teaching methods and through hands-on experiential activities in computing that will prepare graduates to make an impact throughout their careers in IT.

Information Technology Program Outcomes

1. Discuss and evaluate potential technology-related ethical dilemmas and apply decision-making techniques to resolve them.
2. Demonstrate proficiency in selecting, implementing, and operating information technology solutions to meet project requirements.
3. Apply essential IT support skills in order to install, configure, secure, and troubleshoot operating systems, programs, networks, and pc hardware.
4. Prepared to take and pass industry-standard certification exams.
5. Develop the ability to use oral and written communication effectively with clients and other industry professionals.
6. Engage in teams to develop and/or implement IT-based project solutions.
