

### **Welding Program Mission Statement:**

The mission of the Welding Program at Southern West Virginia Community and Technical College is to prepare students for a safe, profitable, and successful career in the welding industry. Coupling hands-on training, with a knowledge of industry standards, students will leave the program ready to be leaders in their chosen field.

### **Welding Program Goals:**

- Ensure that students understand the importance of working safely
- Provide training that simulates real-world situations
- Foster a program that focuses on the needs of the individual, helping them attain the goals that they have set

### **Welding Program Outcomes:**

Students will:

1. Communicate effectively, verbally or written, to others during presentations and report writing.
2. Apply critical thinking and math skills during electrical engineering simulations and apply various scientific laws.
3. Demonstrate consistently the concepts of safety.
4. Display professionalism when working in a culturally diverse environment
